March 13, 2020

Dear Parents and Guardians,

We are working with the state agencies and IDPH to monitor the impact of the Coronavirus. As of this moment we WILL remain open and will take direction from ISBE, and state health officials regarding school closures. We are working to adjust our school calendars so children can have as many days as possible in school with teachers given the impending school closures across the nation.

Our teachers have prepared instructional materials that are being sent home in preparation for possible closures. Our social workers will be reaching out to you to share with you any additional information later today. We are asking that you please make sure we have accurate information in terms of emails, cell phone numbers and other contact information.

We will continue to share with you information regarding E-Learning opportunities should it become necessary and information regarding school closing if necessary.

Please let me know if you have any questions.

Thank you for your partnership.

Ann M. Craig,
Director of Educational Services/Principal
